Dear Examiner Nguyen:

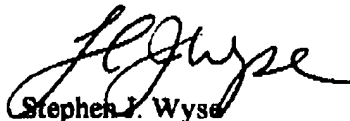

Please consider this an informal communication regarding the Patent Application referred to above. I have tried to reach you without success, so I have attached a proposal for amending claim 1. Our hope is that it will accelerate prosecution of this case, though we reserve the right to pursue other claims, for example in a continuation application.

Please review the attached claim and let me know if you have any suggestions for alternate or additional changes.

I am working from home today; my contact information is below. You may also reach the attorney who filed the last Response in this file, Robert Kelly, at the number listed in the Response.

Thank you for your attention to this matter.

Best regards,

Stephen J. Wyse
